

Luca Berton

Cloud Native Engineering Leader & Author

Specializing in AWS/Azure/GCP, Kubernetes, Ansible, Terraform, and end-to-end MLOps. Building secure, scalable platforms that ship and save.

Engineering Excellence at Scale

Luca Berton is a cloud native engineering leader with deep expertise across multi-cloud environments, container orchestration, and full-stack MLOps. I designs high-availability, secure platforms and has led automation at million-resource scale, driving \$3M+ yearly savings and +25% operational efficiency.

My work spans resilient hybrid cloud solutions compliant with SOC 2 and ISO 27001, AI-driven ESG products serving 100+ SMEs, and GPU workload optimization for enterprise ML pipelines.

1M+

Resources Automated

\$3M+

Annual Savings

25%

Efficiency Gain

Core Expertise

Multi-Cloud Platforms

AWS, Azure, GCP architecture and deployment at enterprise scale

Kubernetes & Orchestration

High-availability clusters, GPU scheduling, multi-tenant security

Infrastructure as Code

Ansible, Terraform, CI/CD pipelines automating millions of resources

End-to-End MLOps

Model orchestration, feature stores, observability, cost optimization

Professional Journey

Dell Technologies — Senior Consultant

2024–Present

Leading cloud native transformations for major European financial institutions including BPCE, Société Générale, and ABN AMRO. Architected AI-driven ESG calculators serving 100+ SMEs.

Red Hat — Ansible Software QE

2019–2022

Automated test frameworks for 2,000+ cloud use cases across AWS and Azure. Contributed to Log4Shell Ansible remediation adopted by millions.

1

2

3

JPMorgan Chase — VP Infrastructure

2022–2024

Designed and deployed million-resource infrastructure with Ansible, Kubernetes and Terraform, achieving +25% efficiency and \$3M annual savings.

Select Client Impact

1

Safran

POC with Red Hat OpenShift AI + GPU Device Plugin, NVIDIA MIG, ClearML, and Run:ai. Secured multi-tenant GPU training with ~40% infrastructure overhead reduction.

2

Société Générale

Automated disaster recovery for 25,000+ VMware VMs using Dell PowerMax + Ansible with custom Python dynamic inventory, enabling near-seamless failover and failback.

3

ABN AMRO

Integrated Ansible Automation Platform with Azure Pipelines, managing 85,000+ resources via Ansible, Bicep, and ARM templates.

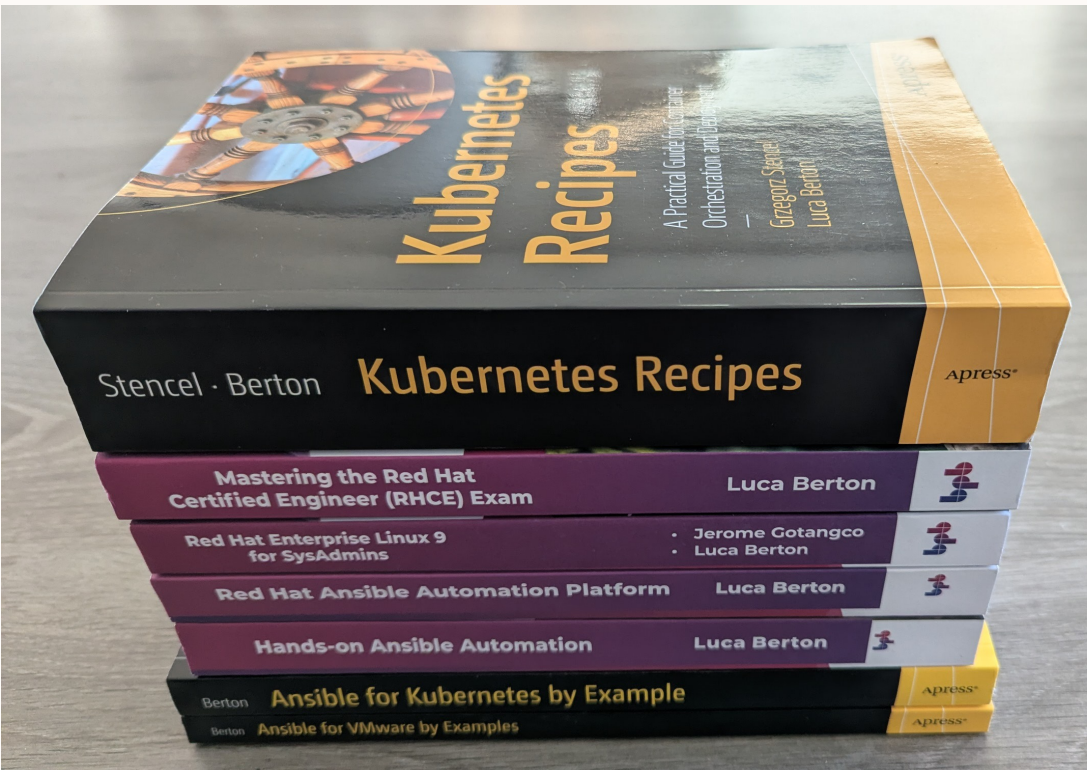

4

LevelUP ESG

Architected AI-driven ESG calculators serving 100+ SMEs, enabling accessible sustainability measurement for organizations without enterprise budgets.

- Kubernetes Recipes — Apress/Springer, Apr 2025
- Red Hat Enterprise Linux 9 for SysAdmins — BPB, Feb 2025
- Mastering the RHCE Exam — BPB, Dec 2024
- Red Hat Ansible Automation Platform — BPB, Dec 2023
- Ansible for Kubernetes by Example — Apress, May 2023
- Ansible for VMware by Examples — Apress, Dec 2022

Speaking & Advisory Topics

Platform Engineering at Scale

Lessons from automating ~1M resources with Kubernetes, Terraform, CI/CD, and policy compliance baked in from day one.

Pragmatic MLOps

From prototype to production—feature stores, model orchestration, observability, and cost control strategies that work.

Secure AI & Cloud

Designing SOC2/ISO27001 aligned platforms with runtime security and eBPF-powered visibility using Tetragon.

GPU Workloads on K8s

Multi-tenant GPU orchestration with MIG and DRA, intelligent scheduling, and cost-performance trade-offs.

ESG Technology

Building AI-powered ESG calculators for SMBs—data architecture, calculation methods, and measurable impact.

Hands-On Workshops

Interactive labs covering Kubernetes, Ansible, Terraform, CI/CD pipelines, and cloud automation best practices.

Multi-Platform Instructor

Coursera

- Operationalizing ML Models
- Intro to Chip Design with Open Source EDA
- API Validation with Postman
- Back-End Infrastructure

Pluralsight

- Optimizing Azure DevTest Labs
- Federated Learning & Privacy-preserving RAGs
- K8s Labs: Storage & Scheduling
- The IT Ops Sessions

Educative

- Automating IT Infrastructure with Ansible

YouTube

~50K views/month on Ansible & Terraform Pilot channel with 300+ hands-on demos and use cases

Certifications & Credentials

RHCSA

Red Hat Certified System Administrator

LFCE

Linux Foundation Certified Engineer

AWS

EKS & Database Certifications

Tetragon

Cisco/Isovalent Security Visibility Architect

Languages: Italian (native), English (professional), French (limited), Czech & Dutch (elementary)
